EXPERIENCE

Zoox Inc., USA & Italy — *Technical Programme Manager*

01/2018 - 04/2019

- Resolved >100 technical problems during prototype build phase to meet project gateway successfully.
- Successfully managed the system supplier during build phases using self-created management tools and system trackers
- Took the lead on interface management to ensure all Zoox engineering components had working and achievable interfaces with Body.
- Held and led daily issue resolution meetings between multiple teams across multiple disciplines, time-zones, and countries.
- Regularly presented issue resolutions at Senior & Director level and consistently achieved agreement and direction.
- Delivered >90% of prototypes from Italy to Zoox and test houses on time and worked with teams to adjust test schedules for remaining vehicles.

McLaren Automotive, UK — *Project Leader (Body Engineering)*

02/2017 - 12/2017

- Successfully delivered P15 & P13S projects to gateway by leading and resolving changes through established change control process.
- Resolved more than fifty complex technical problems with carbon fibre composite and metallic component designs and assemblies
- successfully lead offshore staff teams in resolving multiple technical concerns to ensure gateways were met on time
- Engaged management & leadership on more than twenty occasions to resolve key concerns and ensure visibility of requirement changes

Jaguar Land Rover, UK — *Lead Engineer (Adv. Body Engineering)*

07/2011 - 06/2016

- Delivered L551 & D8 20MY to gateways within 10% of budget for total Body and complete alignment with all internal stakeholders, identified gaps to requirements and resolution paths.
- Resolved > 70 technical challenges on L551 project to ensure alignment for gateway and clear path to budget / technical agreement
- Successfully updated key requirements of D8 20MY project following engagement with Marketing, Design, Manufacturing and Strategy teams to identify the true product nature and balance the business needs with market trends and customer requirements.
